

Prof. Stig Enemark – Brief CV.

Stig Enemark was born in 1943. He studied at the Royal Academy of Agriculture in Copenhagen, and in 1966 he obtained the degree of M.Sc. in Surveying, Planning and Land Management. In 1970 he was licensed for cadastral surveying and he worked for ten years as a consultant surveyor in private practice, specialising in cadastral surveying and land management.

Since 1980 he has been employed at Aalborg University, the School of Surveying and Planning, as Associate Professor and Reader in Land Management. For thirteen years he was Head and Managing Director of the School of Surveying and Planning (1992-2005). He is currently a full professor in PBL and Land Management.

He is the current President of the Danish Association of Chartered Surveyors (DdL). In 1984-1994 he acted as Chairman of the Professional Committee being responsible for the annual professional meetings and for developing the professional areas. In 1994-2003 he acted as the Vice-President of the Association, being responsible for educational strategies and international affairs. In this regard, he was responsible for designing and implementing the Danish concept of CPD and for developing the international profile of the association.

Since 1997 he has been the Danish delegate to the Council of European Geodetic Surveyors (CLGE), and he is an invited Fellow of the Royal Institution of Chartered Surveyors.

He has consulted widely to the Danish National Survey and Cadastre and he played a key role in implementing the Danish Cadastral Reform. He has also consulted to the European Union and the World Bank especially in Eastern Europe, Sub-Saharan Africa and Latin America on the establishment of appropriate land administration systems and related issues such as capacity building, education and training.

He has been active in FIG since 1984 as the Danish national delegate to Commission 2 (Professional Education). He served as Chairman of the Commission 2 (1994-1998) with a focus on developing the educational policies of FIG especially in the areas of Continuing Professional Development (FIG publication no. 15) and Quality Assurance (FIG publication no. 19). He has offered institutional support on developing the educational basis in a number of developing countries and countries in transition. He also developed the Surveying Education Database, which is now serving as a forum for Academic Memberships of FIG. In 1999 he was appointed an Honorary Member of FIG, and in 2004 he was elected Vice-President of FIG 2005-2008.

He has around 250 publications to his credit in the areas of cadastre, land administration, land management and spatial planning, and the interaction between education, research and professional practice. He has presented invited papers at more than 60 international conferences. A full CV and a full list of publications is available on www.land.aau.dk/~enemark
