Letter of support

for Tomasz Malinowski for the position of vice president of FIG, 2025-2028

Tomasz Malinowski has been an active member of the Association of Polish Surveyors (SGP) for many years and has served as vice president of the Association for two years. Among his many tasks resulting from his membership in the main board, he also undertakes activities in other areas of the Association's activity. He is, among other things, the chairman of the Committee of the SGP for Development and Promotion and actively cooperates with the Committee for International Cooperation and the Committee of Young Surveyors. The Association of Polish Surveyors strongly supports his candidacy for the position of vice-president of FIG in the 2025-2028 term. With his commitment and energy, he can reliably and effectively carry out the tasks set before him.

Although Tomasz Malinowski does not have a long history of activity for FIG, he certainly made a good impression during the FIG2022 Congress organized in Poland in Warsaw. In the opinion of the organizers and participants of the Congress, he is a very communicative person, an excellent organizer, a man of action, and always ready for various challenges. In the geodetic environment in Poland and abroad, he is known as a high-class specialist open to new challenges and technologies and with an interdisciplinary and comprehensive approach to solving engineering tasks. His culture, optimism, energy, ability to work in a team and effectiveness are the features that make him an excellent manager. Tomasz has extensive experience and undoubtedly skills in promotional activities and establishing cooperation with business partners. He is very involved in promoting the Association and federation and has recently supported FIG's efforts to obtain sponsors and exhibitors for the Working Week 2024 conference in Ghana. His personal qualities and actions make us see him as a leader, capable of building a team around him that can carry out demanding tasks, and a perfect candidate for the vice president of FIG.

The Association of Polish Surveyors can provide Tomasz Malinowski with administrative and organizational assistance, which will be needed to perform his duties effectively in FIG.

Warszawa, Poland 10.01.2024

To: whom it may concern;

Dear sirs

I have been asked for supplying my opinion about nomination of Tomasz Malinowski to be Vice-President of the FIG.

I know personally Tomasz for (OMG – how the time is going quickly) for 27 years. We have been working together for 24 years, when Tomasz became Deputy Director of TPI – company of consolidated turnover of 25 mEUR.

Our company is active in 6 countries of Central/Eastern Europe. Acting in multiple countries pushed Tomasz to work within different culture environment that is fundamental to develop business/activities in multi-cultural world.

Tomasz is absolutely Team Player. Co-management of bigger organization requires proper organization of team-work/ sharing duties – and I confirm that Tomasz feels well in establishing cooperation between different stakeholders.

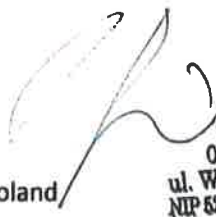

Dynamism – no doubt TradeMark of Tomasz – what you could easily see during FIG Congress in Warsaw. Doesn't matter if we speak about 2004 or 2024 Tomasz remains reservoir of energy that our community should use. I am absolutely convinced that this can enrich FIG structure.

Yes - Tomasz is Surveyor. Formally and mentally. Formally – as he graduates from Faculty of Geodesy of Agriculture University of Wrocław – one of the most appreciated surveying related faculty in Poland. Mentally – as he grew up in family with strong surveying roots. But his skills do exceed by far typical competences of Surveyor. Tomasz feels very well in world of marketing/PR – that does not seem to be very common within our society, where function of external perception of our profession is often by far underestimated. Tomasz experience as Chief of Sales and Marketing of TPI can increase our potential for fight for better perception of our surveying community.

And last – but in my opinion very important element. Tomasz is coming from business – and his potential duties related to co-management of FIG would require him to partially step out from duties he is doing nowadays. Management Board of TPI – which I have the honour to lead - took decision to share part of his duties so that he could concentrate to bring values to community of global surveyors – that we, as a company – feel to be part of.

Yours sincerely;

Andrzej Jaroszewicz ,
CEO of TPI – Warsaw Poland
