| Applying of the Mobile Versions of Google Earth and AutoCAD for Field Control of a Specialized map of a Large Urban Garden   |  |  |  |  |  |  |  |  |  |
| 7. Field Control of the map, Using: Smartphone, Google Earth and AutoCAD WS  |  |  |  |  |  |  |  |  |  |
| The created digital model of the urban garden was subject of field checks to ensure the completeness<br>of the information.<br>The entire situation of the garden was controlled and compared both on site and in the model.<br>Usage of a hardcopy (traditional way) - not possible - due to the area 82274 sq. m. of the garden.   |  |  |  |  |  |  |  |  |  |
| Main aspects (not necessary to be executed one by one)   |  |  |  |  |  |  |  |  |  |
| -The model of the garden was imported in *.dxf/*.dwg file in AutoCAD WS- fig. 2;<br>-It was applied parallel with the usage of Google Earth - fig. 3;<br>-The model was divided in parts (when necessary) and generated in *.kmz files - fig. 4;<br>-The data were imported in Google Earth and visualized with the current position.<br>The described steps <i>facilitated</i> the field control of the map.  |  |  |  |  |  |  |  |  |  |
