

FIG WORKING WEEK 2023

28 May - 1 June 2023 Orlando Florida USA

Protecting
Our World,
Conquering
New Frontiers

TS01C:

**REIMAGINING THE CLIMATE ACTION AGENDA
FOR THE GLOBAL SURVEYOR COMMUNITY THROUGH FIG**

The Atmospher

Organized By

Enrico Rispoli – CNGeGL - Italy

Diamond Sponsors

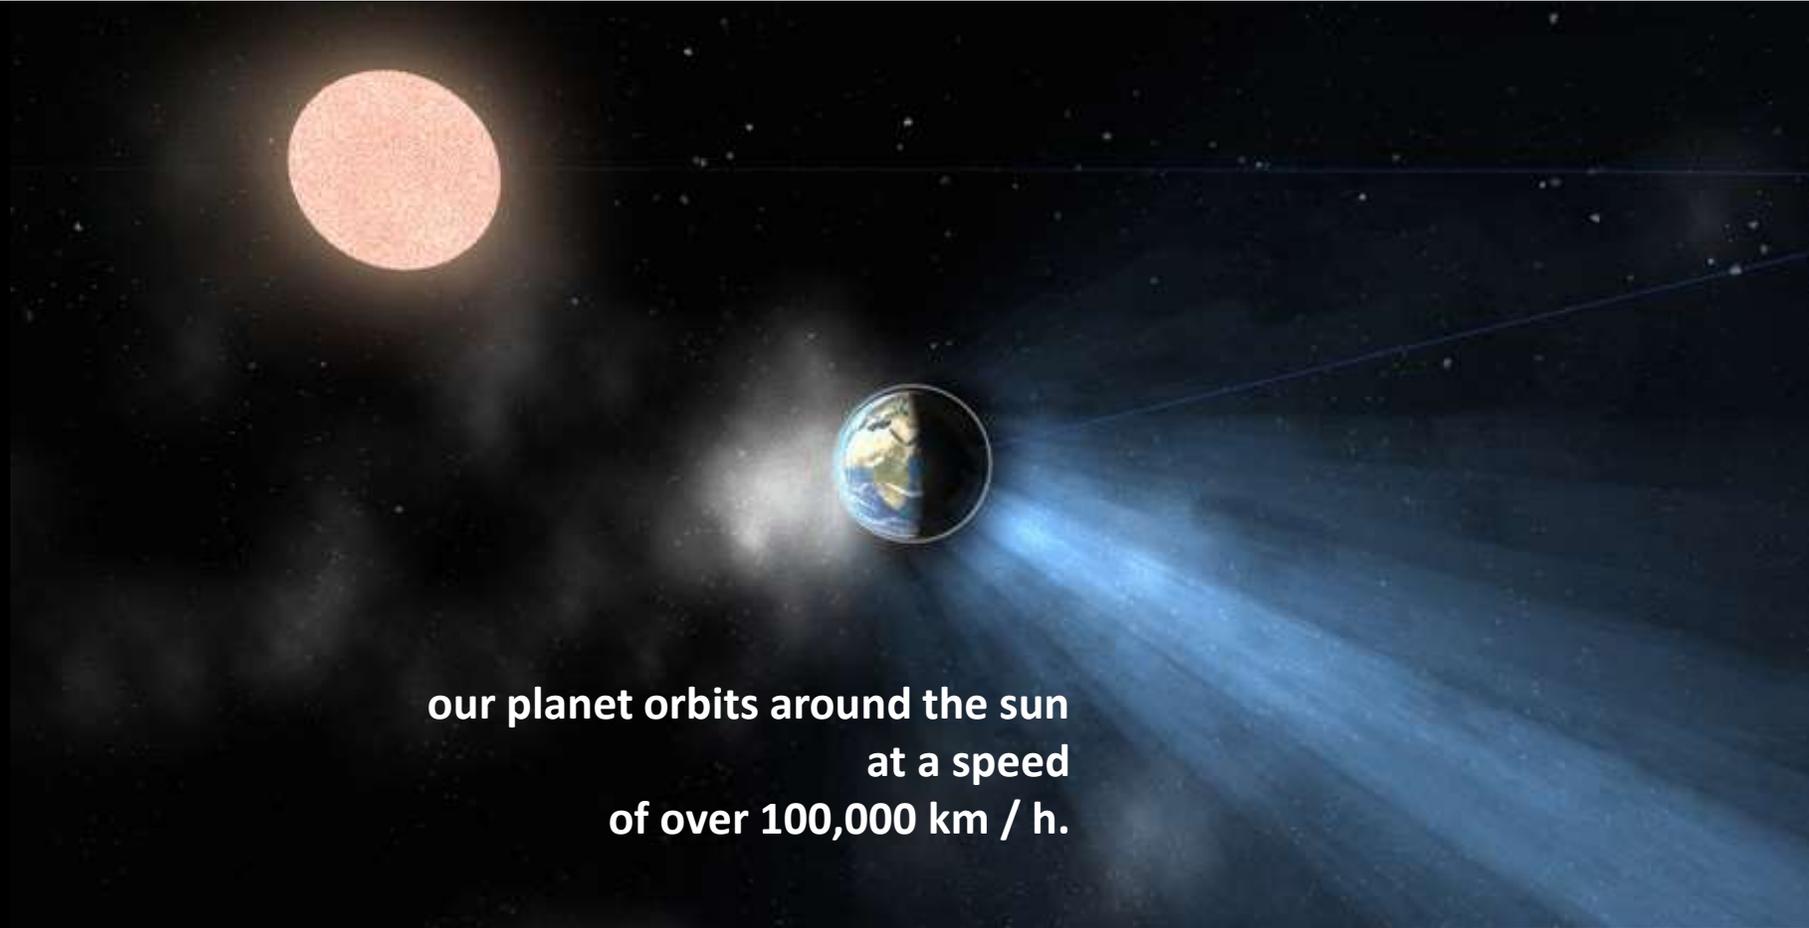

**The atmosphere seems so immense and profound to us,
in reality it is very subtle compared to the size of the earth**

FIG WORKING WEEK 2023

28 May - 1 June 2023 Orlando Florida USA

Protecting Our World, Conquering New Frontiers

our planet orbits around the sun
at a speed
of over 100,000 km / h.

FIG WORKING WEEK 2023

28 May - 1 June 2023 Orlando Florida USA

Protecting Our World, Conquering New Frontiers

We unload pollutants of all kinds like a dustbin

FIG WORKING WEEK 2023

28 May - 1 June 2023 Orlando Florida USA

Protecting Our World, Conquering New Frontiers

Water that descending like rain allows plants to grow and life to exist and also is at the origin of many extreme and devastating phenomena

We will explore an area of our business which is carried out by many colleagues

1. Plant more trees and preserve existing vegetation;

Trees absorb CO2 and improve air quality, lower temperatures, contribute to the maintenance of biodiversity

2. Protect the oceans

Oceans, as well as forests, contribute greatly to absorbing excess carbon dioxide and regulating temperatures

3. Improve the energy efficiency of homes

It is also important to insulate homes so as not to lose heat and reduce energy waste.

We will explore an area of our business which is carried out by many colleagues

4. Opt for sustainable means of transport

It would therefore be desirable to opt for hybrid or electric cars, use public transport or, even better, get around on foot or by bicycle.

5. Reduce the use of plastic

plastic is a highly polluting material that should definitely be avoided in our buildings.

6. Manage cities to properly dispose of waste

the golden rule to help the environment and to combat climate change is to separate waste collection.

We will explore an area of our business which is carried out by many colleagues

7. Follow the three “Rs”: recycle, reuse and reduce;

Limit consumption, buying only durable things that we really need.

8. Invest in waste-free renewable energy sources

Solar, wind, hydro and geothermal energy are in fact non-polluting and sustainable,

9. Ecological food production.

alternatively opting for vegetable products such as fruit and vegetables, cereals and legumes.

FIG WORKING WEEK 2023

28 May - 1 June 2023 Orlando Florida USA

Protecting Our World, Conquering New Frontiers

We, as surveyors, have a great responsibility
To preserve the earth habitable for humankind,
We need the contribution of individual people to be eco-
friendly .. every day.
To preserve our life on the planet we must act now and, if
we do so,
we will still have time to made this Earth again livable for
humankind.
