

Commission 7

2019-2023

PROPOSING A PLATFORM FOR THE 4 YEARS

thank you for the opportunity

Comm 7 has characterized for being a space for colleagues to discuss ideas

I have learnt intensively from
previous Commission 7 Chair

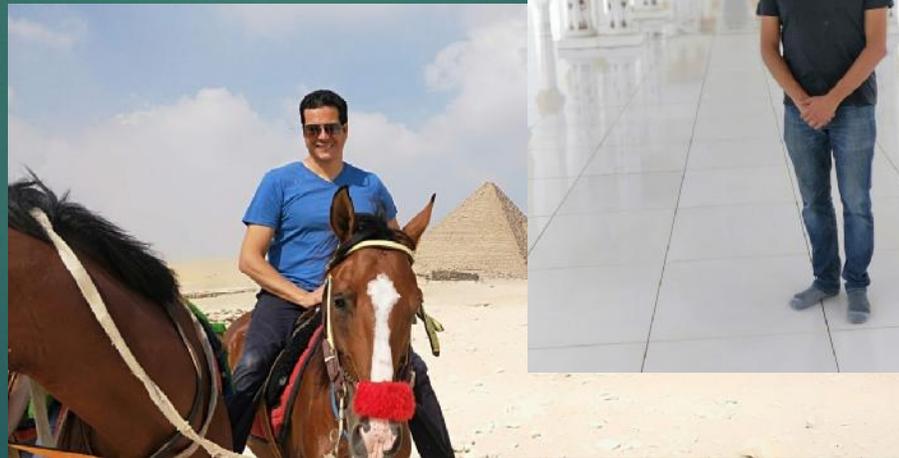

Gerda: teamwork and organization

Daniel: Passion and innovation

Ian Williamson: Diplomacy and vision

...but I am different to them...and I
sure the next Chair will be different
to me too.....

We should continue doing good work under three guiding principles

1. The Commission recognises is an active body of FIG and, therefore, the surveying profession is always present in our activities
2. We are a platform for discussing ideas, not an advocacy group
3. The main contribution of Comm 7 should continue being publications presented in events and other forums

I propose flexibility as the main operational mechanism of the Comm 7

- u Co-Chair: Paula
- u Flexible working group terms
- u Communication with members using multiple mechanisms
- u Multi-language

Everyone could be active in Comm 7 and influence topics and energy of the commission

International Federation of Surveyors
Fédération Internationale des Géomètres
Internationale Vereinigung der Vermessungsingenieure
FIG COMMISSION 7
Cadastre & Land Management

FIG Commission 7 Annual meeting and International Symposium 2012

San Luis, Argentina, 30 Nov. – 4 Dec. 2012

Some topics are emerging for Comm 7 in the next 4 years

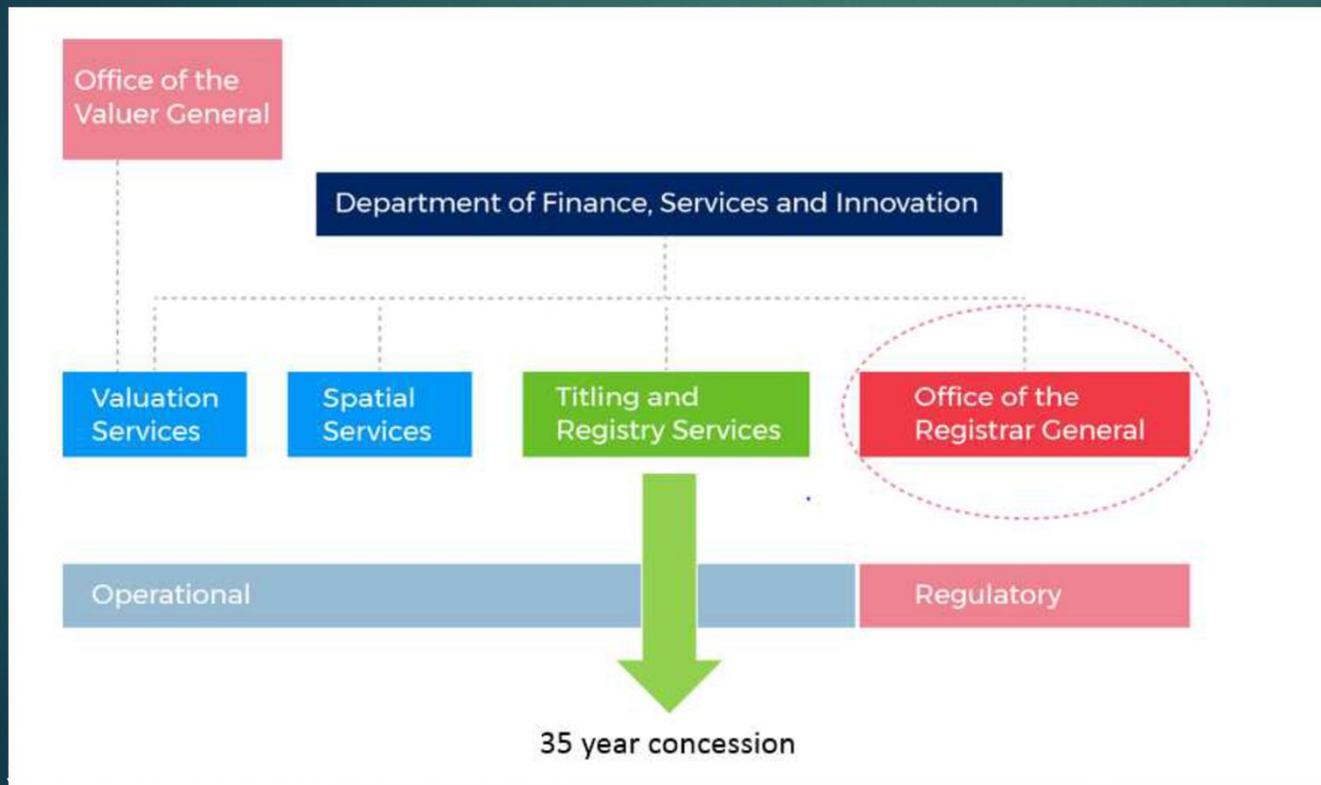

- u Fit-For-Purposes implementation
- u Cadastre template 2.0: SDG
- u Urban agenda
- u Land PPPs

Consortium partners for the Land PPP study

- 13-month timeline
- 3 broad stakeholder consultations
 - Dubai (Feb 2018)
 - Singapore (2018)

Results in land titling concessions in Australia suggest there are emerging opportunities in the land sector for PPPs

NSW case study

- Government estimated asset price at USD\$1.5 billion
- Concessionaire paid USD\$2 billion:
 - Reduce cost
 - Automation
 - New technologies
 - Property market forecast
