LANDSCAPE PLANNING. A CONTRIBUTION TO THE RURAL LAND DEVELOPMENT

Adrianna Pulecka
Warsaw University of Technology
Poland

INTRODUCTION

1. LAND CONSOLIDATION IN POLAND IS FORCE BY EXTREMELY SCATTERED SPATIAL STRUCTURE OF FARMS
2. LAND CONSOLIDATION PROCESS MAY THREATEN THE UNIQUE CULTURAL AND AESTHETIC VALUES OF RURAL LANDSCAPE
3. A SYSTEM OF LANDSCAPE STUDIES FOR LAND CONSOLIDATION PROCEDURE IS NECESSARY

INVENTORY OF LANDSCAPE RESOURCES

1. INVENTORY PROCESS SHOULD BE THE SOURCE OF CHARACTERISTICS AND LOCATIONS OF PARTICULAR LANDSCAPE COMPONENTS, SUCH AS:
   - PLANT COMMUNITIES,
   - MONUMENT BUILDINGS AND STRUCTURES,
   - OBJECTS OF TOURIST INTERESTS,
   - TERRAIN TOPOGRAPHIC AND GEOLOGICAL FEATURES AND SURFACES,
   - TOURISTS INFRASTRUCTURE, ETC.

2. IN LANDSCAPE APPROACH THE AREA OF INVENTORY SHOULD BE WIDER THAN THE LIMITS OF THE AREA UNDER THE LAND CONSOLIDATION. IT SHOULD BE LIMITED BY NATURAL LANDSCAPE BORDERS GENERALLY BROADER THAN THE ADMINISTRATIVE BORDERS.

ECOLOGICAL STUDY

1. STUDY SHOULD BE DONE BY INTERDISCIPLINARY TEAMS OF EXPERTS.
2. ECOLOGICAL ELEMENTS OF THE LANDSCAPE STRUCTURE SUCH AS:
   - TERRAIN DEVOTED FOR PRESERVING LANDSCAPE, NATURAL HERITAGE AND HABITATS OF UNIQUE AND ELIMATED SPECIES
   - WATER RELATIONS AS CONCERNED TO WATER COURSES, EROSION AND SEDIMENTATION AREAS, WETLANDS, SWAMPS, FLOODED AREAS ETC.
   - TERRAIN CONTRIBUTION SHOULD BE IDENTIFIED.
VIEW-ASPECTS STUDY

STEP 1

THE FOLLOWING PARTICULARS SHOULD BE TAKEN INTO ACCOUNT:

• spatial dominants
• particular spots

STEP 2

DEFINITION OF ‘VISUAL JUNCTION’ AND ‘FUNCTIONAL JUNCTIONS’ BETWEEN PARTICULAR SPOTS

STEP 3

VIEW-CONNECTIONS, VIEW-AXES, VIEW-POINTS ETC. SHOULD BE IDENTIFIED AND MARKED AT THE MAP

STUDY OF LANDSCAPE ACCESSIBILITY

THE PUBLIC ACCESS TO THE LANDSCAPE SHOULD BE PRESERVED.

PROPOSALS OF PUBLIC FOOTWAYS, BRIDLE PATHS, CYCLE TRACKS AND OTHER POINTS AND LINES OF LANDSCAPE OBSERVATION AND ACCESS TO THE OBJECTS SHOULD BE SCHEDULED.

STUDY OF LANDSCAPE USE; LIMITS OF OWNERSHIP RIGHTS

STEP 1

Identification of landscape structures and elements of exceptional value requiring a special way of use

STEP 2

Limits resulting from above should be included to the guidelines of post-consolidation land management

STEP 3

All limits should be identified at the map of use limits

STUDY OF VALUE OF LANDSCAPE COMPONENTS

Traditional approach
• Soil quality and distance from settlement

Landscape-oriented approach
• Market value of landscape components

STUDY OF PRESERVING AND TRANSFORMATION OF LANDSCAPE COMPONENTS

The following should be taken into account

• relations between natural and cultural landscape forms
• connection of settlement forms and terrain natural features
• restoring possibilities of historical landscape structures
• counteraction against landscape globalisation and decay of regional landscape forms
CONCLUSION

Landscape oriented rural land development must be supported by comprehensive studies.
The study of value of landscape components is exceptionally important as far as land re-allocation procedure concerns.
