

## MAP RELATED PROJECTS

IN GENERAL DIRECTORATE OF LAND REGISTRY AND CADASTRE  
IN TURKEY

**Sedat BAKICI & Güler YALÇIN & Ömer YILDIRIM**  
General Directorate of Land Registry and Cadastre of TURKEY – GDLRC

16/06/2008

 FIG STOCKHOLM 2008

TS1E

Land has an important role for societies every era. Land related information such as land registry and cadastre has a great importance in human life, especially while it's known that land is a scarce source too.

Therefore General Directorate of Land Registry and Cadastre in Turkey began many land and map related projects and these have been executed especially from the beginnings of 2000s. Such as;

- Completion of Initial Cadastre
- Land Registry and Cadastre Information System (TAKBIS)
- Continuously Operating Reference Stations Project(TUSAGA-Aktif/CORS-TR)
- Map Production Follow-on Project (HBB)
- Ottoman Land Registry Archive Information System (TARBIS)
- Turkish National Geographic Information Infrastructure Project
- Cadastral Renovation Project

3

## Map Production Follow-on Project (MAP PRODUCTION MONITORING CENTER)

- ❖ First application in Turkey.
- ❖ It is in coordination of GDLRC.

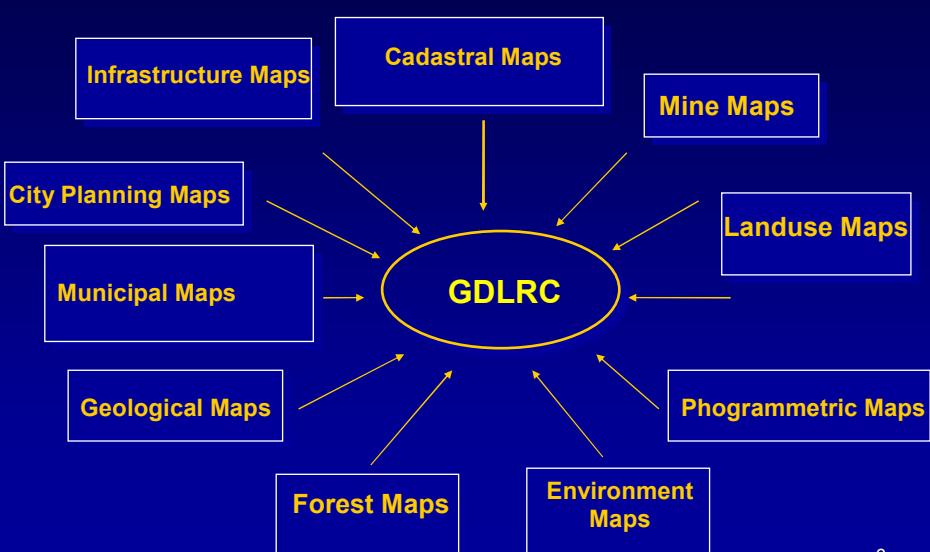

4

## LEGAL INFRASTRUCTURE

- Metadata Portal that is named as **Map Production Monitoring Center (MPMC)** is based on Articles 103, 104 and 105 in **Large Scale Maps and Map Information Production Regulation**.
- Duty to establish this metadata portal is referred to **GDLRC**.
- MPMC is a component of **Information System for Land Registry and Cadastre (TAKBIS)**.

5

**AIM 1:** to store all map\_related metadata from different organizations in one database.

6

**AIM 2:** To provide the standardization for production of large scale maps (1/5000 and bigger scale).

**AIM 3:** To prevent the duplicate map production.

**AIM 4:** To constitute a substructure for e\_government.

**AIM 5:** To collect large scale spatial data in the concept of Spatial Data Infrastructure (SDI).

**AIM 6:** Standardization for map\_related metadata using ISO 19115.

7

**AIM 7:** To get true and reliable metadata in time and fast.

8

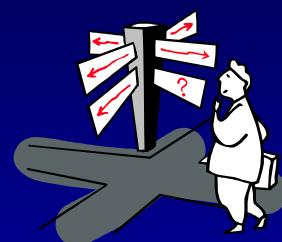

**AIM 8:** To follow the map production in one center.

**AIM 9:** To avoid waste of time to search any data in huge amount of metadata

9

**AIM 10:** To provide needed data to the Services of Decision Making Systems fast and effective.

10

**AIM 11:** To provide the cooperation among the institutions, organizations and private sector.

11

## REGISTRATION METADATA

## SEARCH GROUND CONTROL POINTS

### NUMBER OF GROUND CONTROL POINTS

The screenshot shows a Windows Internet Explorer window titled 'Yer Kontrol Noktası Sorgulama - Windows Internet Explorer'. The URL is 'http://212.175.137.45/metadata/Yerkontrol.aspx'. The page contains the following text:

Noktalara ait koordinat değerleri yaklaşık değerlerdir. Kesin koordinatlar için Tapu ve Kadastro Genel Müdürlüğü'ne başvurunuz.

Son Nokta Sorgulama     Yaklaşık Koordinat Sorgulama     Nokta Analizi

Sorgulanacak olan noktalar 19/5/2008 tarihi itibarı ile güncellidir.

**Son Yer Kontrol Noktası Sorgulama**

1/100.000 lük Paşa Adı      Nokta Turu

G  43  C3-ASN  Ara

Son Nokta Numarası = G4330326 Bu numaradan sonraki nokta numaralarını alabilirsiniz.

19

## YER KONTROL NOKTALARI SORGULAMA

### APPROXIMATELY COORDINATES

### ACCORDING TO THE SHEETS IN DATUM ED50

The screenshot shows a search interface titled 'ED-50 Datumunda YKN Sorgulama(Paşa ile)'. It features a grid for entering coordinates:

100.000	50.000	10.000	5.000
Seq	Seq	Seq	Seq
Seq	Seq	Seq	Seq
Seq	Seq	Seq	Seq
25.000			
Seq	Seq	Seq	Seq

Ara

### ACCORDING TO THE SHEETS IN DATUM ITRF

The screenshot shows a search interface titled 'ITRF Datumunda YKN Sorgulama(Paşa ile)'. It features a grid for entering coordinates:

100.000	50.000	10.000	5.000
Seq	Seq	Seq	Seq
Seq	Seq	Seq	Seq
Seq	Seq	Seq	Seq

**HARİTA ÜZERİNDE NOKTA ANALİZİ**

**Tür Seçiniz**  ITRF  ED50

**Sorgula** **Sonuçları Aktar**

Lütfen arama yapmak istediğiniz noktayı ekranındaki butonuna bastıktan sonra harita üzerinde tıklayarak belirleyiniz. Belirlenen nokta etrafında arama yapılmak istenen tampon bölge uzaklığını ekranındaki kontrol aralığı bölümündeki listeden seçiniz. Daha sonra Sorgula düğmesine basarak yer kontrol noktası sorgulama işlemini tamamlayınız. Yapılan sorgunun sonucunda bulunan nokta sayısını Sorgula butonu üzerinde görüntülenecektir. Sonuçları görüntülemek için Sonuçları Aktar butonunu kullanınız. Sonuçlar Yer Kontrol Noktası Sorgulama ekranında görüntülenecektir.

## REGISTRATION METADATA

Online Metadata Registration

- Content type
- Spatial boundaries
- Data Information
- Information of data owner
- Information of distributor institution
- Last step

30

## Current Situation In MPMC Project

- Software is completed
- It is possible to register metadata online
- Metadata about Photogrammetric Maps are registered and searched on website.
- Numbers and approximayetly coordinate values of Ground Control Points are searched. Analysis of the Points can be done.
- Other Institutions are registering their metadata

[www.tkqm.gov.tr](http://www.tkqm.gov.tr)

<http://hbb.tkqm.gov.tr/metadata>

31

## CONCLUSION

Common Metadata Information environment for all map\_related institutions

GIS Metadata Catalog in one-stop

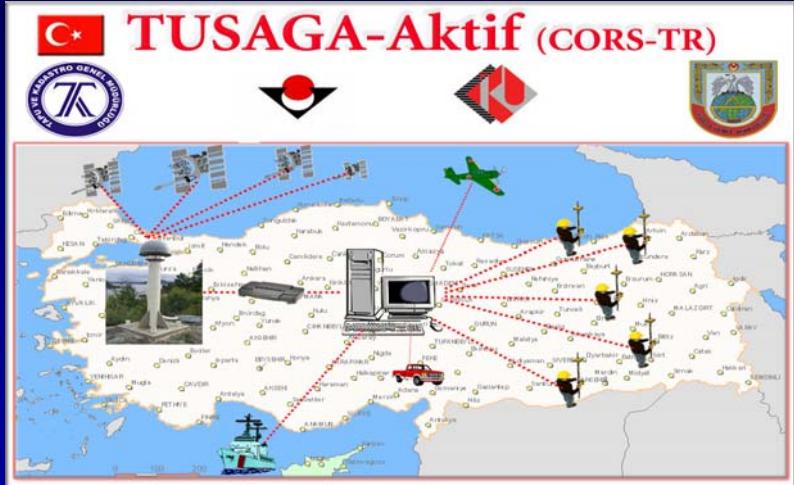

Reference to the origin web-site or origin institution

Unique production of map\_related data

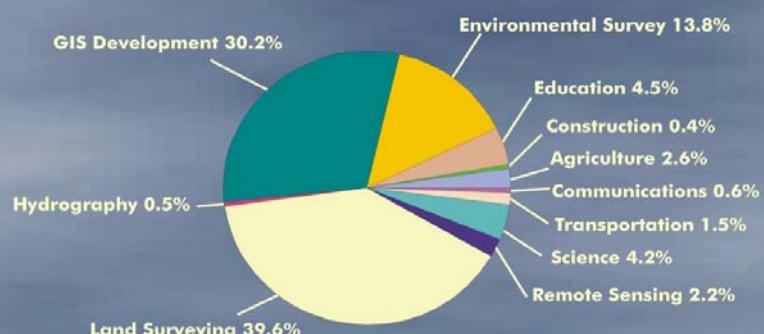

Subconstruction to the e\_government and EU INSPIRE

32

## Establishment of Turkish CORS and Datum Transformation Project

## CORS Applications

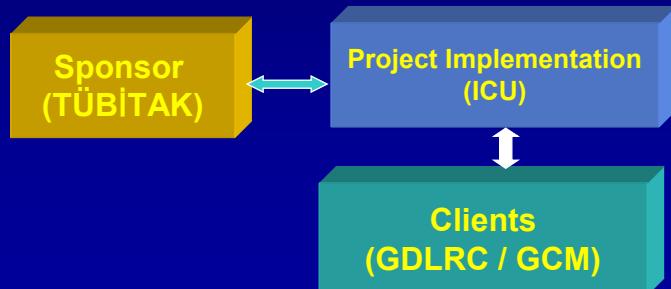

5,646  
Survey responses  
Fall 1999

34

## **TUSAGA-Aktif (CORS-TR) PROJECT**

- Proposed to TÜBİTAK (Turkish Scientific and Technological Research Council) by ICU, GDLRC, GCM
- Signed on 18 April 2006
- 31 Months Project with a budget of about 6.59 Million YTL (3.3 Million Euro)

35

## **SCOPE OF PROJECT**

- Establishment of CORS-TR covering entire Turkey with 24 h. RTK Positioning, thus meeting precise geodetic positioning requirements of Institutions without needing for any conventional geodetic network points (triangulation, traverse, etc.)
- Assesment / Development of Datum transformation between ED50 and ITRFyy Datum.
- Carry out research on plate tectonics, earthquake and atmosphere

36

## PROJECT IMPLEMENTATION

- Benchmark Testing
- Design of CORS-TR
- CORS Site Selection
- Hardware / Software Selection
- CORS-TR Installation and Operation
- Determining Common ED50 – ITRFyy Points and GPS Surveys  
(About 10x10 km spacing)
- Determining national datum transformation surface

37

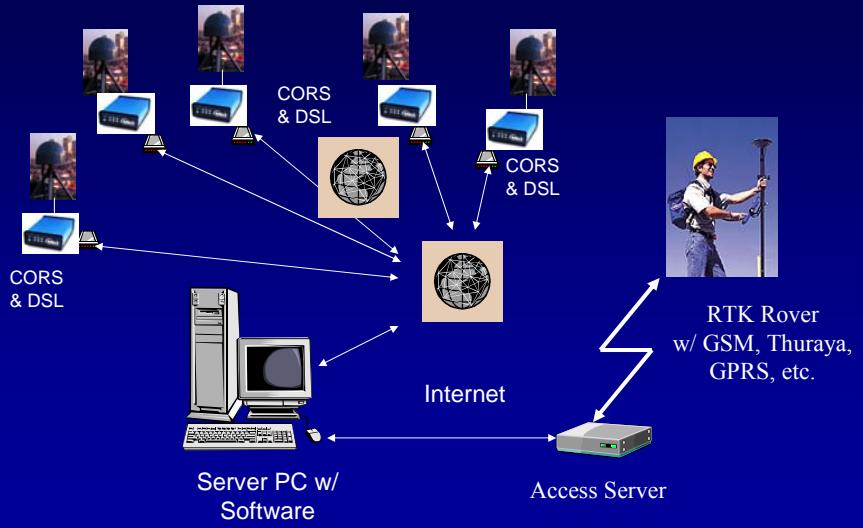

### Benchmark Testing (With 13 Points)

To test GPS receivers & antenna , Control Center Software, most optimum interstation ranges and communication, internet and other relevant infrastructure in TR.

38

## System Design 145 Stations and 2 CC)

39

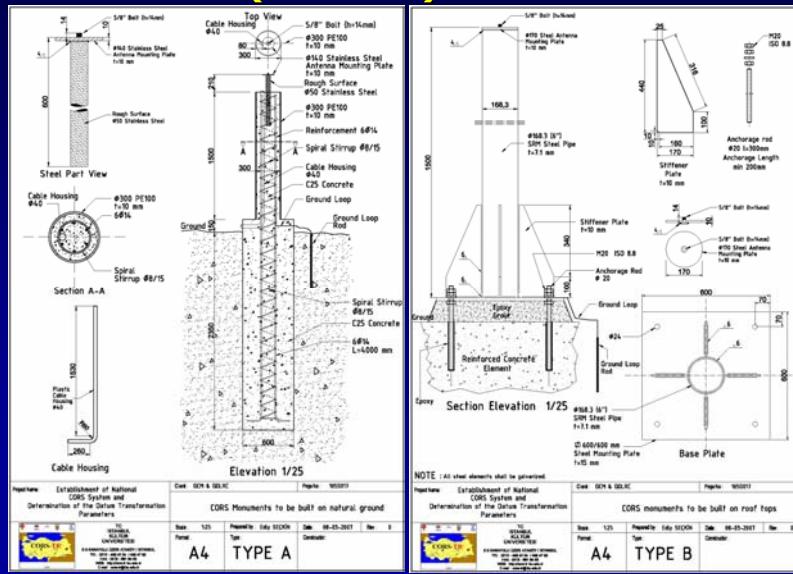

## CORS TR Site Selection

CORS-TR Interstation Distance (80-100 km)

40

## TUSAGA-Aktif (CORS TR) Monumentation

41

## TUSAGA-Aktif (CORS TR) Monumentation

42

## Determining National Transformation Parameters

- About 7500-10000 common points of ED50 & ITRFyy will be GPS surveyed (approximately 3000 common points are available)
- Analytical surface will be fitted for the entire country
  - Linear regression
  - Minimum curvature surface
  - Thin plate splines
  - Stochastic models
  - Others
- Thus, about 50000 map sheet will be transferred from ED50 datum to ITRFyy datum

43

## PROJECT OUTPUT

### Engineering Applications

- All spatial IT (geoinformation) Projects
- Geodetic engineering surveys
- Mapping and cadastral surveys, GIS activities, etc.
- Planning and environmental activities
- Monitoring engineering structures (displacement, deformation ..)
- Utility surveys
- E-government, e-municipality, e-commerce activities
- Other spatial projects

### Scientific Applications

- Earthquake engineering and seismic activities
- Modeling troposphere and ionosphere
- Meteorological predictions
- Deformation, monitoring tectonic plate movements
- Transportation, navigation, vehicle tracking, etc.

44
