

Capacity Building experiences and insights in the Caribbean

David Neale
University of the West Indies

Capacity building

“the process by which the organization assesses the status of current arrangements and assists States to achieve sustainable development and improvement in their ability to meet hydrographic, cartographic and maritime safety obligations with particular reference to recommendations in UNCLOS, SOLAS, and other international instruments.”

International Hydrographic Organisation

Three phases of capacity building development

Phase 1: Collection and circulation of information

Phase 2: Creation of a technical capability (surveying)

Phase 3: Independent production (charts)

- a) talk
- b) Standards & technology
- c) training

The end
