3D-GIS
 3D GIS in the Cloud

Water Supply
 Material: Steel
 Diameter: 12"
 Slope: 1.2 %
 Discharge: 220 Cu.M/h
 Wall Thickness: 0.406"

Sivan Design

Corporate Overview

Founded	<ul style="list-style-type: none"> ▪ Founded in 1999 (1996) privately held
Core Business	<ul style="list-style-type: none"> ▪ GIS integrated IT turnkey solutions ▪ 3D simulation and visualization software ▪ Large scale mapping ▪ Surveying, mapping and Civil Engineering software
Products and solutions	<ul style="list-style-type: none"> ▪ GeoERP is a GIS based IT solution suite for the management of a country's most viable resources ▪ 3D GIS – 3D GIS web based/iPad Server solution ▪ CivilCAD 2012 – civil engineering software suite
Worldwide Locations	USA, Israel, Romania, Nigeria, Portugal, India, Belgium, China, Kenya, Ghana, Ethiopia, Uganda, Zambia
Solid Financial Backing	15% Yearly Revenue Growth
Strategic relationships	<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>esri Partner Network</p> </div> <div style="text-align: center;">  <p>Microsoft CERTIFIED Partner</p> </div> <div style="text-align: center;">  <p>Autodesk Authorised Developer</p> </div> <div style="text-align: center;">  <p>BRICSYS</p> </div> </div>

4 **Sivan**_{esign}

3D GIS

Key Features

- Convert data/projects from 2D to 3D in few steps
- Purely web application (3D GIS Studio, and 3D GIS Explorer) with no installation
- Cloud computing approach
- Viewing, Analyzing and Exploring in 3D
- 3D Features
- Support for the most common data formats and Geo-Spatial protocol
- Available for iPad and mobile devices

3D GIS

Data Sources – Creating the 3D World

- **Terrain** – GeoTiff, DEM or TIN
- **Raster** – GeoTiff, ECW
- **3D Native Models** – Collada, Sketch-Up, KML, Multi-Patch, OBJ
- **Existing GIS data from**
 - Shapefiles
 - FileGDB
 - ArcSDE
 - ORACLE Spatial
 - SQL Server Spatial
 - Web Map Services

3D GIS

Application Benefits

City Planning
3D GIS

Roads
3D GIS

Infrastructure
3D GIS

Cadastre
3D GIS

- ✓ Development control
- ✓ Web enabled for planning consent
- ✓ Design implications
- ✓ Animation

- ✓ Faster decision making
- ✓ Landscape integration
- ✓ Work efficiency and quality assurance
- ✓ Infrastructure Coordination
- ✓ Safety audits

- ✓ Underground Infrastructure Coordination
- ✓ Traffic arrangements

- ✓ Spatial Parcels and Sub Parcels
- ✓ 3D boundary buffers
- ✓ Underground expropriation
- ✓ Level based topological rules

7 **Sivan**^{esign}

City Planning 3D GIS

Main Advantages

- **Development control through 3D Visualization –**
 - Existing Vs. Design test-case scenarios
 - Billboards and Masts
 - Skyline effects
- **Web Enabled –**
 - Support local governments in achieving planning consents with communities and industries
- **Design Implications –**
 - Shadow analysis
 - Line of Sight Analysis
- **Animation –**
 - 3D flythrough animations for various uses such as touring

8 **Sivan**^{esign}

Roads 3D GIS

Main Advantages

- **Decision Making Process** –
 - Detailed 3D model of the designated road
 - Real-time information per spatial object (land owner, zoning, etc.)
 - Birds eye view clearer for the non-technical
- **Landscape integration** –
 - Nature environmental costs
 - Querying land culture
- **Infrastructure Coordination** –
 - Road affect on existing infrastructure
 - Maintaining infrastructure safety buffers
- **Safety Audits** –
 - Line-of-sight and visibility region checks
- **Work efficiency** –
 - Automated quality assurance tests
 - Reducing possible human errors

9

Sivan^{design}

Infrastructure 3D GIS

Main Advantages

- **Underground Infrastructure Coordination** –
 - Avoiding breakdown maintenance
 - Efficient preventive maintenance
 - Collision free planning
- **Design** –
 - 3D Layers inspection
 - Slopes and minimum distances

5/16/2013

10

Sivan^{design}

Cadastre 3D GIS

Main Advantages

- **Upper and Underground Cadastre** –
 - Spatial lot, parcel, and sub-parcel
 - Displacement distances
 - Spatial registration plan
- **3D boundary buffers** – of spatial lots, parcels, and sub-parcels
- **Underground expropriation** – of spatial lots
- **Level based topological rules** – as a result of subterranean space changes
