Bentley Systems – Observations on Industry Trends
Bentley’s mission is to provide innovative software and services for the enterprises and professionals who design, build, and operate the world’s infrastructure – sustaining the global economy and environment for improved quality of life.
Today’s Challenges

- Ensure digital models represent reality
- Keep pace with change in GIS and engineering data
- Maximising information re-use at all stages
- Managing information across multiple systems
- Optimizing asset performance
Converging…!
Thank you!
