

Valuation of Unregistered Land Operational Manual - Next Stages

James Kavanagh and Ben Elder (United Kingdom)

Key words: Access to land; Cadastre; Informal settlements; Land management; Professional practice; Security of tenure; Valuation; Keyword 1; Keyword 2; Keyword 3

SUMMARY

Valuation of unregistered lands represents an important challenge in most developing countries. Land registration projects are frequently confronted with issues related to unregistered or informally held lands. Social development practitioners frequently have to deal with issues around valuation of unregistered or informally held lands when involuntary land acquisition and resettlement is required in development projects. This paper will discuss the developing methodologies inherent within the manual, ongoing outreach/collaboration and capacity building, and case studies.
