

ISO – Core Cadastral Domain Model

Christiaan Lemmen
Seoul, Korea
May 20th 2007

Core Cadastral Domain Model

- Development: 2002 – 2006
- Cadastre 2014
- Workshop in Enschede, Netherlands
- Workshop in Bamberg, Germany
- Several Publications
- Version 1.0 presented in Munich, Germany

Core Cadastral Domain Model - ISO

- FIG Standards Network
- New Work Item Proposal
- Comments from nine countries received
- Reaction provided by Lemmen / van Oosterom
- Will be discussed in Rome, Italy next week

Core Cadastral Domain Model – ISO Reaction – 1

- CCDM is discussed with scientists and system developers from Iceland, Portugal, Slovak Republic and Greece
- UN Habitat requested fro a prototype
- System Boundary

Core Cadastral Domain Model – ISO Reaction – 2

- Application Models and TC 211
- De-facto standards
- Full support from some countries
- No support from other countries: rationale should be better communicated
- Support to multi purpose cadastre
- Attention to developing countries

Approach

- Discussion in Rome about application domains
- Design a draft standard
- Standard on conceptual level describing the static part seems to be achievable
- System development

Thank you
