Teaching Surveying: What is important?

Bruce R. Harvey
B. Surveying, Grad. Dip. Higher Education, Ph. D. UNSW, Registered Surveyor NSW
School of Surveying and Spatial Information Systems
The University of New South Wales

My list of what is Important:

1 Attitude  
2 Explain  
3 Prepare  
4 Know our students  
5 Variety  
6 Involve students  
7 Involve yourself  
8 Aims and objectives  
9 Respect  
10 Assessment and feedback  

11 Survey camps and practical classes  
12 Rewards for the teacher  
13 Longevity of the teacher  
14 Efficiency  
15 Technology and Innovation  
16 Evaluation of teaching & learning  
17 Future-proof education in Surveying  
18 On the job training & work experience  
19 Reflection by students & teachers  
20 Learning & Teaching Plans, …Graduate attributes

Why?  
Surveying Examples?  
Read my paper
What are students thinking about while we teach?

Spot the errors
– an example of student involvement

Data revealed during presentation

FIG Congress 2010
Facing the Challenges – Building the Capacity
Sydney, Australia, 11-16 April 2010
Conclusions and Recommendations

- No teacher or supervisor will ever be perfect, but there are ways to improve the quality of learning.
- The attitudes of teacher and student are more important than any recommended teaching method.
- Students learn by experience but they learn more by thinking about what they are doing.
- Students can learn from their mistakes, if they are aware of it and know how to avoid it, or how to do better next time. A teacher, or surveyor in a supervisor role, can assist with that.
