1. Introduction
2. Theoretical concept
3. Methodology
4. Results
5. Conclusion

FIG Marrakech May 19, 2011

kadaster

2

1. Introduction

- Can voluntary contributions of citizens offer additional opportunities to develop cadastral systems?
- Can the internet-communities stimulate such discussions?

FIG Marrakech May 19, 2011

kadaster

3

2. Theoretical context

- Open systems
 - Internal or external actors
 - Scalability
- Voluntary geographic information
 - Goodchild research

FIG Marrakech May 19, 2011

kadaster

4

2. Theoretical context

Table 1. Concerns on VGI and open systems

	Main concerns from a socio-organizational perspective	Main concerns from a technical perspective
Voluntary information	<ul style="list-style-type: none"> • Participation versus exclusion • Power and (in)equality • Local versus central expertise • Autonomous / independent views vs accountable views 	<ul style="list-style-type: none"> • Complementarity of datasets vs. redundancy • Ad hoc / occasional vs. systematic data collection
Open systems	<ul style="list-style-type: none"> • Scalability versus local use (socio-organizational) • Unlimited access vs. controlled access • Collective agency vs collective benefits • Rule making vs. rule enforcement 	<ul style="list-style-type: none"> • Large vs small applications (geographic) • Data quality vs data completeness • Flexibility vs regulation in standards

FIG Marrakech May 19, 2011

kadaster

5

3. Methodology

- Literature
- Internet discussion fora
- Question: can social media have added value to the formal statutory cadastral systems that exist world wide?
- Nov-dec 2010

FIG Marrakech May 19, 2011

kadaster

6

3. Methodology

Social media network	Discussion group	Number of members (on 5 April 2011)
LinkedIn	Land information systems (LinkedIn)	298
	Spatial data infrastructure and development (LinkedIn)	65
	NSDI group (LinkedIn)	842
	FIG (LinkedIn)	277
	Openstreetmap	1192
	Mortgage professionals	6235
	UNSDI	101
	Participatory Geographic Information Systems & Technologies	856
	ITC Alumni	896
Wikimapia	Wikimapia.org/forum	7500
Dggroups	Dggroups.org	Unknown

FIG Marrakech May 19, 2011

7

4. Results

- Necessity
- Legality / role of the government
- Legitimacy control
- Economic effects
- Quality control
- Technology

FIG Marrakech May 19, 2011

8

Necessity

- Deininger 2010: why is it going so slow?
- Citizen centric paradigm
- Slum dwellers etc.
- It is already happening

FIG Marrakech May 19, 2011

kadaster

9

Legality

- At the end it is always the government
- But where starts the end?
- Conflict resolution.

FIG Marrakech May 19, 2011

kadaster

10

Economic effects

- Will banks bother?

FIG Marrakech May 19, 2011

kadaster

11

Quality control

- Level of openness
- Transparency
- Balance of power
- Legitimacy control

FIG Marrakech May 19, 2011

kadaster

12

Technology

- Social context
- Mobile telephones in Africa
- Wikimapia/Google mapmaker

FIG Marrakech May 19, 2011

kadaster

13

Technology

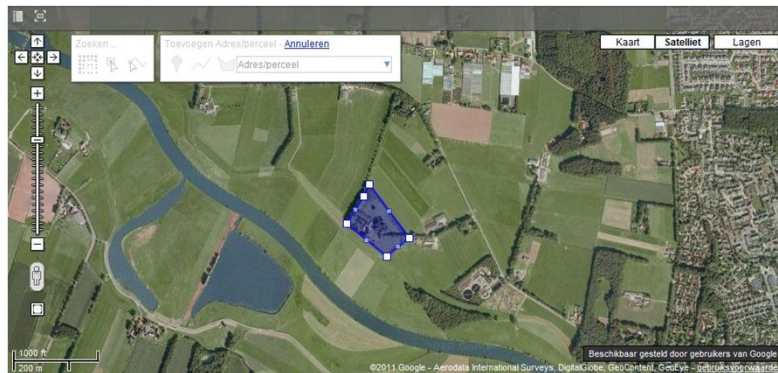

FIG Marrakech May 19, 2011

kadaster

14

Technology

FIG Marrakech May 19, 2011

kadaster

15

5. Conclusions

- Many issues in VGI applicable
- Level of self interest is main difference
- Legitimacy control needs further study
- Internet fora have some value

FIG Marrakech May 19, 2011
