**FIG WORKING WEEK 2012**

May 8-10, 2012

Rome, Italy
Should the alterations made change the shape of the building, it will be necessary first to update the cadastral map and afterwards to update the cadastral database.

If the alterations done don’t change the shape of the building, it will be necessary to update the cadastral database only.

In every case where shared properties are modified, it will be necessary to update the planimetry paper.

This continuous updating guarantees that what is shown in the cadastral database represents precisely what has been built.
THANK YOU
