GLTN and Land Tools

Cyprian Selebalo: UN-Habitat/GLTN
GLTN considers that a tool is a **practical method to achieve a defined objective** in a particular context. More precisely, a tool facilitates decision processes based on knowledge to move from principles, policy and legislation to implementation.

Land tool development can be understood as the processes of reviewing, developing, documenting, implementing (including piloting and up-scaling), disseminating, evaluating and monitoring the tools.

Land tool can be a guide, criteria, software, training package, manuals, guidelines, frameworks, etc.
GLTN Tool Development – Generic Steps

1. Scoping Studies
   - Global knowledge
   - Current initiatives

2. Consultations
   - EGMs, E-Forum, Meetings, Workshops

3. Product Development
   - With and through partners
   - Specific products, i.e., criteria, guidelines, software (STDM)

4. Piloting/Testing
   - At country level, with partners

5. Revision/Adoption/Dissemination
   - Consultations with partners
   - Revisions, enhancement
   - Publication and dissemination

6. Training
   - Devt. of training packages
   - Conduct of training, i.e., TOTs

- Specific products, i.e., criteria, guidelines, software (STDM)
Five Themes & Eighteen Tool AREAS

1. ACCESS TO LAND & TENURE SECURITY
   1a. Enumerations for tenure security
   1b. Continuum of land rights
   1c. Deeds or titles
   1d. Socially appropriate adjudication (STDM)
   1e. Statutory and customary
   1f. Co-management approaches
   1g. Land record management for transactability
   1h. Family and group rights

2. LAND MANAGEMENT & PLANNING
   2a. Citywide slum upgrading
   2b. Citywide spatial planning
   2c. Regional land use planning
   2d. Land readjustment (slum upgrading and/or post crisis; PILaR)

3. LAND ADMINISTRATION & INFORMATIONS
   3a. Spatial units
   3b. Modernising of land agencies budget approach

4. LAND-BASED FINANCING
   4a. Land tax for financial and land management

5. LAND POLICY AND LEGISLATION
   5a. Regulatory framework for private sector
   5b. Legal allocation of the assets of a deceased person (Estates administration, HIV/AIDS areas)
   5c. Expropriation, eviction and compensation
EIGHT CROSS CUTTING ISSUES

1. Capacity development
2. Post conflict and post disaster situations
3. Environmental sustainability
4. Gender
5. Grassroots
6. Islamic aspects
7. Land governance
8. Youth
GLTN is working on the development of different land tools,

1. PILaR - DEFINING FEATURES

A preeminent tool for inclusive city extension including densification and supply of serviced urban land through a negotiated process.

KEY SAFEGUARDS

Mainstreaming:
• Social safeguards
• Environmental safeguards
• Gender, youth & other vulnerable groups

• Not only a technical exercise
• Governance focused
• Broadly consensual
• Community driven
• Negotiated land sharing
• Pro-poor, gender responsive, etc.
• Equitable distribution of costs and benefits and value sharing
• Opportunity to mediate differences
Participatory and Inclusive Land Readjustment (PILaR)

Input parcels
Before Land Readjustment Project

Output parcels
After Land Readjustment Project

Land Contributions

Mr. A's Land Parcel
Mr. B's Land Parcel
Mr. J's Land Parcel

Contribution

Roads
Green Areas
Reserve Land
Public Facilities

Construction Cost
Compensation Cost
Office Work Cost

Project Implementation Cost

Other Financial Resources
1. Government Subsidies
2. Grant
3. Cost Sharing
4. Others
2. Land Based Financing

• Aims at addressing challenges in availability of the financial resources necessary to support and sustain urban development particularly in many developing countries.

• Many urban authorities are seriously under-resourced and hence unable to meet the ever-growing demand for basic services and new infrastructure as well as the maintenance of existing infrastructure and services.
WHAT IS THE LBF TOOL?

- Collective name to range of tools local governments can use to expand revenue base for financing urban development.
- Based on land being a key factor of production and important source of financing urban development. Immovable - taxes and fees tied to land cannot be avoided by relocating to another place.
- People who live and work in a community obtain benefits from that community such as the use of public roads and other public services.
- Tool has two parts (Reader and Guide)

**Reader** presents and describes a range of instruments:
- Annual tax on immovable property
- Public land leases and land sales
- Developer exactions
- Classical land value sharing
- Betterment charges and special assessments
- Transfer of developments rights (TDR)
- Transfer taxes and stamp duties
3. Costing and Financing of Land Administration Services-CoFLAS

- A set of guidelines and tabular framework that allows for exploring, identifying and prioritizing land administration service (LAS) delivery options based on costs of developing and running the services, financial resources available to pay for them, as well as other considerations such as human capacity and strategic decisions like service coverage.

- The tabular costing structure built in the tool assists government staff to prepare and assess LAS reform proposals whilst at the same time taking into consideration the variation in approaches that would have an impact on the cost and viability of the reform.

- Develop a useful and practical methodology (tool) whereby the costing and financing of land administration services in developing countries can be reformed and modernized with a view to enabling the agencies provide cost effective, efficient, sustainable and affordable services.

- The methodology, where appropriate and through incremental process, ought to lead to some kind of cost recovery, but without compromising quality of services provided and limiting access to services especially of the poor and vulnerable.
4. Gender Evaluation Criteria (GEC)

The Gender Evaluation Criteria is a **flexible framework to test** the gender responsiveness of land tools.

Factors for tools to be considered gendered: Equal participation, Capacity building, Sustainability, Legal and institutional considerations, Cultural considerations, Economic considerations

**Evaluation process:**

- Composition of evaluation team (preferably multi-stakeholder and women-led)
- Preparation of evaluation (selection of relevant criteria, localizing of matrix, translation, etc.)
- Evaluation (data collection and interviews, analysis, etc.)
- Validation exercise (evaluation team and key stakeholders), incl. score card approach for the six criteria
- Evaluation report, incl. recommendations and action plan
Women’s Access to Land – Global Initiatives

GEC was developed in 2008-2009

- It has been introduced in over 40 countries to a broad range of stakeholders
- The tool was successful implemented in Brazil and Uganda through a long-term process
- It was also piloted in Ghana, Nepal, and Togo
- Proved to be effective in collecting data, managing knowledge and producing rigorous evaluation
- Sustained processes for collaboration between land professionals and community practitioners advocating for women’s land rights

The GEC methodology facilitates a broad-based participation of key stakeholders in the choice of options, and subsequently for the implementation of activities, the collection of the necessary data and the validation of the evaluation results.

*Its flexibility and ability to adaptation to new contexts and areas of land policy has been a useful characteristic of this tool.*
5. Youth & Land Responsiveness Criteria

What is it?

• A simple and practical method to assess the capacity of land-related assumptions, policies, frameworks and projects to respond to the needs and concerns of youth in relation to land.

What can it be used for?

• To collect and analyse youth and land data at local, regional and national levels;
• To collect baseline data for specific youth and land-related projects;
• As a planning and implementation tool for projects and programmes;
• At the problem identification stage of planning, before an intervention is designed;
• To assess the impacts that a land-related project/programme may have on youth;
• To make recommendations to a policy-maker on improving the youth responsiveness of the land sector.
6. SOCIAL TENURE DOMAIN MODEL (STDM)

- A pro poor, gender responsive and participatory LIS developed by GLTN.
- Land tool for capturing party to spatial unit relationship regardless of levels of formality and accuracy
- Supports the Continuum of Land Rights concept
- Can be applied in various contexts, complements other tools and it is a specialization of the ISO-approved LADM
- Key tenets include affordability, flexibility, equitable, good governance, sustainable and scalable
- It has been implemented in following situations:
  - Informal settlements in support of upgrading initiatives
  - Settlements profiling for inform city planning initiatives
  - In peri-urban area to address gender aspects of customary tenure
  - Rural agricultural activities to assess farming land acreage by smallholder farmers
  - Recording land mediation results in post-conflict situations
STDM: THE CONCEPTUAL MODEL

Social Tenure Relationship
- Use rights
- Occupancy
- Customary tenure
- Tenancy
- Ownership
- Rent, leases
- Permits
- Etc

7. Women’s ACCESS TO LAND in Muslim Contexts

WHAT IS THIS TOOL?

- This tool – going under the working title of “Achieving social and economic development by Increasing Women’s Access to Land in the Muslim World: A Set of Guidelines” – is based on global gender-responsive land approaches, series of consultations with partners and experts, case studies review and analysis, and on the GLTN research on Islamic land principles offering opportunities for enhancing women land and property rights.

- International and regional legal and policy frameworks, Islamic land law provisions, lessons learnt and good practices are combined into a set of guidelines that will help women, families, land practitioners, community workers and decision makers to increase access to land for women in the Muslim world.
Women’s ACCESS TO LAND in Muslim Contexts

The key elements:

- **What protects women access to land** (international/regional / national legal and policy frameworks, etc.);

- **How women can access land** – including ownership, secondary rights, customary and Islamic land related mechanisms.

- **Conflict Contexts**: Often greater reliance on customary and religious norms and systems. Explore opportunities to enhance women’s rights and participation.
8. Land Use Planning and Tenure Security

Often, land use planning exists but is not sufficiently linked with tenure security. The tool proposes a complementary approach to widen the margins for tenure security improvements.

   - A robust Land Use Planning Tool, with special focus on applications in developing countries, and incorporating other experiences and good practices from other organizations and countries.
