Presented at the FIG Working Week 2019, April 22-26, 2019 in Hanoi, Vietnam

"Geospatial Information for a Smarter Life and Environmental Resilience"
The Development of Standards and Ethical Challenges of Surveyors Associations in Russia
by ALEXEY BUKHAROV, RUSSIA
alexey_bukharov@mail.ru
www.roscadastre.ru
I work for ASRO Cadastral Engineers, I do the social media
SRO = Self-Regulatory Organisation = Association of Surveyors
MORAL REALITY VS ETHICAL ISSUES

• Moral reality is the moral issues that have impact on us: we moved from socialism to capitalism

• What we see as ethical issues, defines our response: everything that originates from the State is better

• The individual is to blame
WHAT HAPPENED THEN- THE EMERGENCE OF NEW ETHICS

• All players are equal

• Remove the burden from the individual

• SRO is a new individual
DEVELOPMENT OF STANDARDS, PART II

- Seventeen SROs are active in Russia at present
- Establishment of the National Chamber of SROs of Surveyors
- The State to the rescue
THE RISE OF WOMEN, CHALLENGES

- Women are in the majority
- Women are underpaid
- Maternity protection
THE RISE OF WOMEN - SRO RESPONSE

• equality at work through training (of young professionals)

• how do we celebrate the work of a woman surveyor?
FIG WORKING WEEK 2019
22–26 April, Hanoi, Vietnam

“Geospatial Information for a Smarter Life and Environmental Resilience”
