Registers of Scotland's Journey Towards a Data Drive Land Register and its Alignment with LADM Standards

Alan Howie (United Kingdom)

Key words: Access to land; Cadastre; Digital cadastre; e-Governance; Legislation

SUMMARY

Registers of Scotland have spent the last 4 years looking at the legal, technical, data and ecosystem implications of the move to data driven Land Register for Scotland. The presentation and supporting artefacts will provide an overview of the steps take, alignment to the LADM model, lesson learned and biggest blockers to implementation.
