

China's National Cadaster Information System

Zhao Daihong and Zong Xiang Zha, People's Republic of China

Key words: Cadastre;e-Governance;GIM;Land management;

SUMMARY

al Cadaster information System From 1988, China's land administration has been worked in the last 20 years, the cadastre management has seen its own change in the 20 years. The cadastre information is allocated in the county level. In order to know and understand the cadastre information, China's national cadastre information system should be constructed. The paper described the cadastre system status and cadastre system infrastructure in the future.
