OICRF Annual Report 2015

OICRF - the International Office for Cadastre and Land Records - is one of the permanent bodies of the International Federation of Surveyors (FIG). OICRF serves as a documentation and study centre for land administration and is charged with the following tasks:

- collecting and systematically filing and indexing all documentation material relating to existing cadastres and land registration systems,
- conducting comparative studies of this material and publishing the results,
- providing information and advice on all cadastres and land registration systems to all interested persons and institutions for the purposes of study or to help countries wishing to set up a cadastre or land registration system or improve an existing system, and:
- maintaining the documentation system on a daily basis.

The digital Land Administration Library in 2015

OICRF maintains a digital library that contains 12.087 publications (December 31, 2014). OICRF contents are available in different languages. At the moment there are 284 publications in Dutch, 594 publications in French, 555 publications in German, 64 publications in Italian, 26 publications in Russian, 281 publications in Spanish and 11.507 publications in English. All of the available documents and the most recent publications can be accessed electronically at www.oicrf.org. In 2015 the digital library got about 39.819 visitors. About 27.983 papers have been downloaded. This number is based on the application of Google Analytics; visits from search engines are excluded in this.

Land Administration Domain Model

A special section on the Land Administration Domain Model was published in *Land Use Policy*, Volume 49, December 2015, p527-689. *Land Use Policy* is an international and interdisciplinary journal concerned with the social, economic, political, legal, physical and planning aspects of urban and rural land use. It provides a forum for the exchange of ideas and information from the diverse range of disciplines and interest groups which must be combined to formulate effective land use policies. The special section in December 2015 contains scientific 16 articles. A second edition of the Land Administration Domain Model will be developed in 2017 in close co-operation with the International Organisation for Standardisation. FIG will submit the proposals for the contents of a new edition.

Contact

OICRF does its utmost to provide the best possible service for anyone who requests information. This is made possible by the support of our host: Cadastre, Land Registry and Mapping Agency of the Netherlands.

Dr ir Christiaan Lemmen
OICRF director
Apeldoorn (NL), February 16, 2016

Ms Pauline van Eisland,
OICRF secretary
