

Economic Benefits of Hydrography

FIG Commission 4

Working Group 4.4, TS 21

6th FIG Regional Conference
Coastal Areas and Land Administration- Building the Capacity
San Jose, Costa Rica, 12-15 November, 2007

TS 21 – Economic Benefits of Hydrography

Chair: Mr **Andrew Leyzack** (Canada)

- Mr **Gordon Johnston** (United Kingdom):
The Economic Benefits of Hydrography and Ocean Mapping
- Mr **Serge Lévesque** and Mr **Alexis Cardenas** (Canada):
Marine Geospatial Software: Generating Economic Benefits from Hydrographic Data and its Management
- Capt **Hugo Gorziglia** (Chile):
The Value of Hydrographic Information and its Influence
- Dr. **Voker Boeder** (Germany):
Economic Benefits of Hydrography In Terms of Hydrographic Education

6th FIG Regional Conference
Coastal Areas and Land Administration- Building the Capacity
San Jose, Costa Rica, 12-15 November, 2007

Caveat: This session and the work of the Commission 4 work group on the Economic Benefits of Hydrography is not without due regard for equity in Balancing the triangle between social, environmental and economic gain.

Consider the impact where but one of these factors is somehow detrimentally affected because of a lack of hydrographic data.

A comprehensive understanding of land both above and below the sea and changes effected by the dynamics within this area is based upon an integrated approach to land and hydrographic surveying.

San Jose, Costa Rica, 12-15 November, 2007

Canadian Hydrographic Conference
and National Surveyors Conference
Victoria BC Canada, May 5th - 8th 2008

The Canadian Hydrographic Association and Association of Canada Lands Surveyors welcome you to the Canadian Hydrographic Conference and National Surveyors Conference 2008.

This international event unites delegates from both land and sea surveying and mapping disciplines to discuss the challenges and opportunities for the profession in the 21st century.

Our theme, "**Bringing Land and Sea Together**", promotes the transfer of ideas, knowledge and technology within the greater geomatics community. This exciting event will be held at the [Victoria Conference Centre](#) in beautiful [Victoria, British Columbia](#), Canada.

Bringing
Land and Sea
Together

2008

Commission 4 will be hosting a Workshop to introduce participants to the Commission's 2006-2010 Workplan. Offshore issues including the role of the surveyor in the Administration of Marine Spaces will be discussed.
