**Short biographical notes**

Dr.-Ing. Andreas Drees studied Geodesy in Bonn from 1974 to 1979. After a two-years traineeship in civil service he set up as a licensed surveyor in Münster in 1983 with working fields in cadastre and urban land consolidation. Up to now he is manager of 7 urban land consolidation boards.

1985 Drees received a doctor's degree in the field of close range photogrammetry at Bonn University, where he gives lectures on land management at current.

Since 1992 Drees is sworn property valuation expert. He is member of several local valuation boards and the upper board of the state of Northrhine-Westfalia, too.

1993 Drees was authorized from the State of Brandenburg to carry out rural land consolidation measurements with full responsibility, since 2001 also in Thuringia.

Since 1983 activities in the committees of BDVI, German Association of Public Appointed Surveyors, and DVW, German Society for Geodesy, Geoinformation and Land Management (in both member of the board for many years), 1987-1998 editor of the German surveying magazine FORUM.
