

The Importance of Integration Solutions in Spatial Data Applications

Dr. Emin BANK
Representative of NETCAD
emin.bank@netcad.com.tr

WHO IS NETCAD

- ✓ Netcad is a pioneer **software** company in Turkey.
- ✓ Provides **Project** service for Geographical Information Systems.
- ✓ Used for **Educational** purposes,
- ✓ and expanding **Internationally**.

- ❖ Market Share: **%85**
- ❖ Licence: **+20.000**
- ❖ Users: **+100.000**
- ❖ Employees: **+150**
- ❖ Location:
 - ❖ Ankara Headquarters
 - ❖ İstanbul Region Office

netcad

REFERENCES

Netcad's products and solutions are widely used in Turkey.

Market share of Netcad Technologies in Turkey has grown to **% 85**.

- 800 Municipalities
- 75 Special Provincial Administrations
- 40 Organized Industrial Zones
- 950 Public Authorities
- 4,500 Private Companies

prefer to work with Netcad.

netcad

NETCAD SECTORAL SOLUTIONS

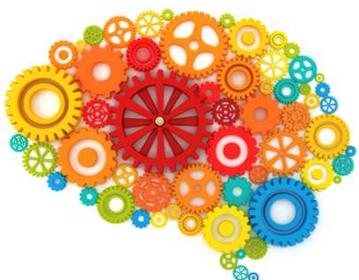

CAD & GIS & Remote Sensing Solutions:

- *Mapping,*
- *Cadastre,*
- *City and Region Planning,*
- *Environment Management,*
- *Agriculture,*
- *Geology,*
- *Forestry,*
- *Transportation,*
- *Urban Automation System,*
- *Land Information System,*
- *Disaster Information System.*

Engineering Solutions

- *Waste Water,*
- *Irrigation,*
- *Drinking Water,*
- *Road & Tunnel & Dam Design,*
- *Mining*

"Netcad has more than 30 desktop, web, mobile and cloud solutions. Projects and products are completely developed through Netigma, a web based software platform developed by Netcad."

netcad

QUALITY

Capability Maturity Model Integration (CMMI) Level 3

Open Geospatial Consortium (OGC) Compliance (Associate Member)

ISO 9001 Quality Management System

ISO 14001 Environment Management System

ISO 27001 Information Security Sufficiency Certificate

IT Technologies Service Sufficiency Certificate

netcad

FUNDED INTERNATIONAL R&D PROJECTS

ON-GOING PROJECTS

- ❖ **FOODIE (FARM ORIENTED OPEN DATA IN EUROPE)**
 - ✓ TOTAL: 12 Partners
 - ✓ PROJECT LENGTH (36 Mnts)
- ❖ **ASUA (ADVANCED SENSING FOR URBAN AUTOMATION)**
 - ✓ TOTAL: 25 Partners
 - ✓ PROJECT LENGTH (36 Mnts)
- ❖ **C3PO (Collaborative City Co-design PlatfOrm)**
 - ✓ TOTAL: 17 Partners
 - ✓ PROJECT LENGTH (36 Mnts)

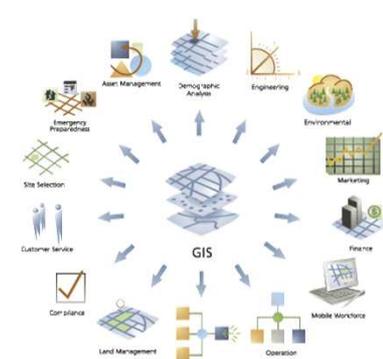

COMPLETED PROJECTS

- ❖ **DICOMA**
 - ✓ TOTAL: 16 Partners
 - ✓ PROJECT LENGTH (30 Mnts)

The Importance of Interoperability and Integration

- ❑ Different departments...
 - ❑ Different data structures...
 - ❑ Different projection systems...
 - ❑ Different formats...
 - ❑ Different platforms...

netcad

GIS Provides an Interoperability and Integration Platform

netcad

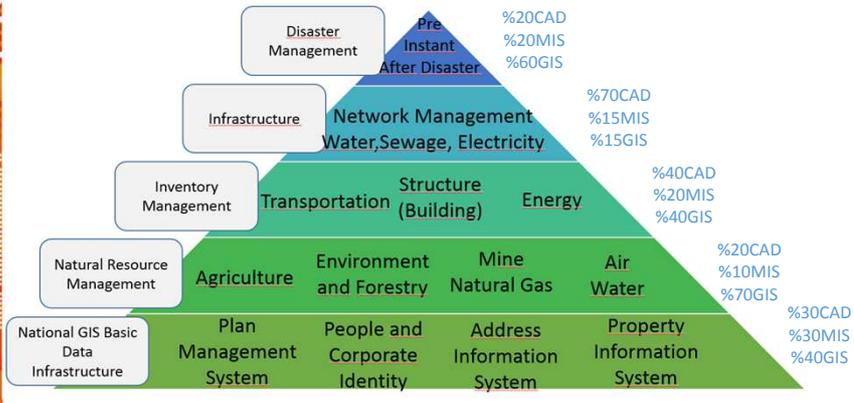

Through GIS...

- Reach all the data fast and easily
- Extended query and analysis opportunity
- Realize the reporting process simply
- The inclusive thematic mapping
- Through sharing all the data via web

netcad

SPATIAL-DATA-BASED PROJECTS...

Project Type	CAD (%)	MIS (%)	GIS (%)
Disaster Management (Pre, Instant, After Disaster)	20	20	60
Infrastructure Network Management (Water, Sewage, Electricity)	70	15	15
Inventory Management (Transportation, Structure (Building), Energy)	40	20	40
Natural Resource Management (Agriculture, Environment and Forestry, Mine Natural Gas, Air Water)	20	10	70
National GIS Basic Data Infrastructure (Plan Management System, People and Corporate Identity, Address Information System, Property Information System)	30	30	40

netcad

The Studies in Turkey...

- ❑ Initial National GIS works in Turkey is dated back to 1990's.
- ❑ A new regulation was published as INSPIRE directive
- ❑ Which data will be SHARED in which STANDART and by WHOM, is defined.
- ❑ All the data should be stored within 3-4 years.

netcad

The Fundamental Needs for Building National SDI

- ✓ The institutions, responsible for the data, have to transfer all the CAD data into the GIS structure and register metadata to the national portal.
- ✓ Integration of the current process automations with GIS will provide them very important advantages.
- ✓ Different type of GIS platforms should interact with each other.
- ✓ E-government services have to be used too.

Netcad has developed various solutions to meet all that needs.

Netcad provides very important tools to the users for having them to transfer all their current data to that platform in a simple way, to use the data in different platforms as integrated and to create portals.

NETCAD Provides INSPIRE Data Theme DB Templates

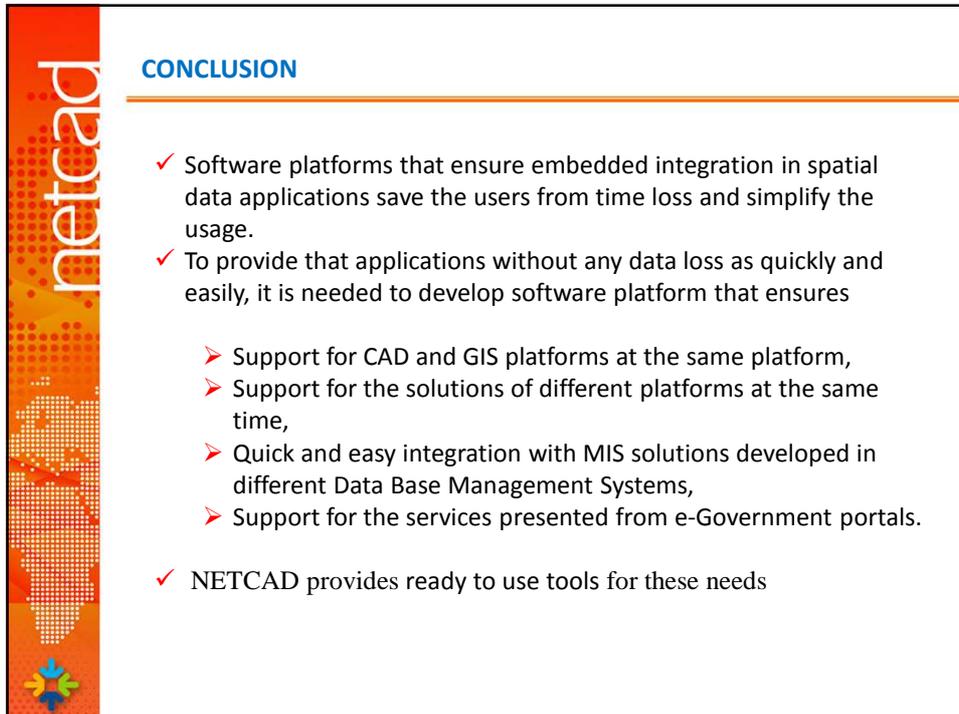

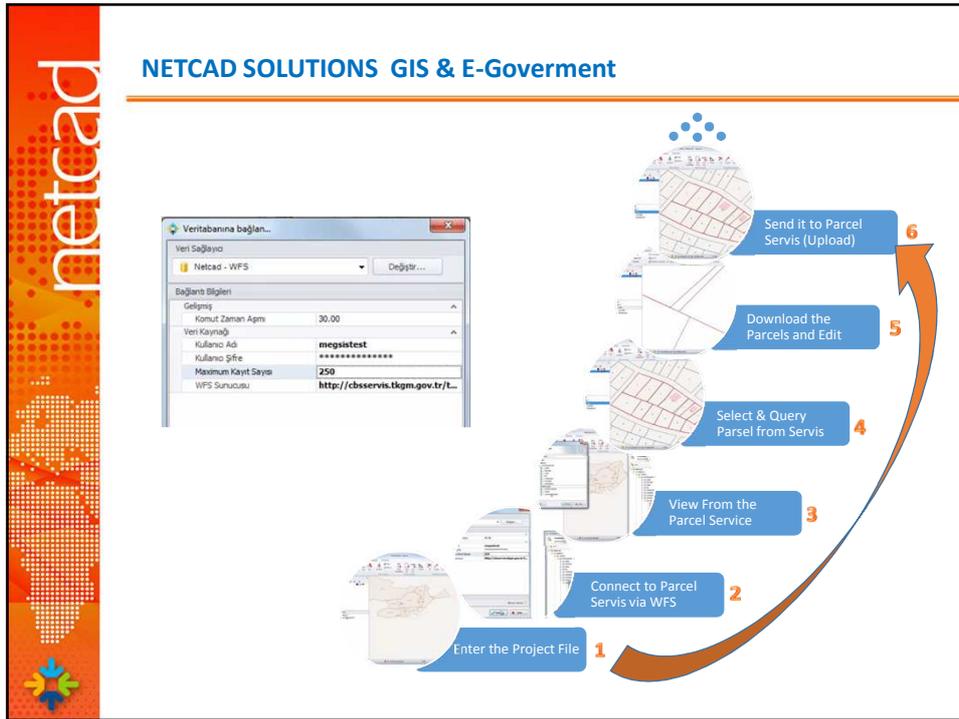

The screenshot displays the NETCAD software interface. A dialog box titled "Yeni Proje İçin Şablon Seçin" (Select Template for New Project) is open, showing a list of data themes. The "TUCBS" theme is highlighted. The background shows a web browser window displaying the "T.C. ÇEVRE VE ŞEHİRCİLİK BAKANLIĞI" (Ministry of Environment, Urbanization and Climate Change) website. The website has a navigation menu with options like "GENEL MÜDÜRLÜĞÜMİZ", "GÖREVELER", "MİSYON-VİZYON", "BİRİMLER", "ORG. ŞEMASI", "BAĞLANTILAR", and "İLETİŞİM". There is also a section for "INSPIRE" and "Taslak Veri Tanımlama Dokümanları" (Draft Data Definition Documents).

NETCAD SOLUTIONS CAD > GIS

The diagram illustrates the workflow from CAD to GIS. It shows a CAD software window with a 3D model of a city, a curved arrow pointing to a web browser window showing a 3D model of the same city in a web-GIS platform, and a curved arrow pointing back to the CAD window.

Project File in CAD Format

Project Data in Web-GIS Platform
